

## Product Overview

The TransTel IPV75H SIP Phone is a sleek and stylish hotel phone that offers exceptional cost per performance. This phone is designed with an emphasis on simplicity and environmental friendliness. It is easy to install and configure, making it an ideal choice for hotels seeking to improve their work efficiency.

This SIP phone supports fast Ethernet with an adaptive 10/100Mbps network port, and it also supports POE power supply. Its high interoperability makes it compatible with major platforms, including 3CX, Broadsoft, Elastix, Asterisk, Xorcom, and many others. The phone comes equipped with a 3.5 inch (480x320) color screen that provides clear and easy-to-read display.
